India France Innovation In Information Technology

NOVEMBER 24-25, 2021

Startup Exhibitions & B2Bs till 30th November, 2021

"History has shown that leadership in new technology drives economic strength, jobs and prosperity. But, our partnerships must also serve a larger purpose, in service of humanity. In my conversations with President Macron and in my summit with the EU leaders in Porto, Digital Partnership, from start-ups to quantum computing, emerged as a key priority."

- Prime Minister of India Sh. Narendra Modi at Vivatech 2021

MINISTERIAL KEYNOTE SPEECHES

Minister of Electronics & Information Technology, INDIA

Minister of Digital Affairs, FRANCE

India and France have a strong, trusted and wide-ranging bilateral cooperation and partnership in the Indo Pacific region and multilateral forums. Fostering closer digital partnership is a key element of the vision for Strategic Partnership between India and France. There are excellent opportunities for partnership that will expand economic opportunities, spur innovation and deep transformation, and advance the shared strategic objectives of building digital sovereignty, competitiveness and leadership in a rapidly digitalizing and transforming world. India and France can also help shape the evolving global discourse on policy, regulation and standards in the digital sphere.

There are strong bilateral relations, innovative and successful digital sectors and rapid digital transformation in the two countries but the digital ecosystems of the two countries call for better integration. InFINITY intends to serve as a platform to foster greater connection and collaboration and will bring together government leaders, regulators, technology leaders, startups, innovation hubs and investors to build a transformative partnership between India and France/Europe.
